

## Covid-19 Air Cargo update

---

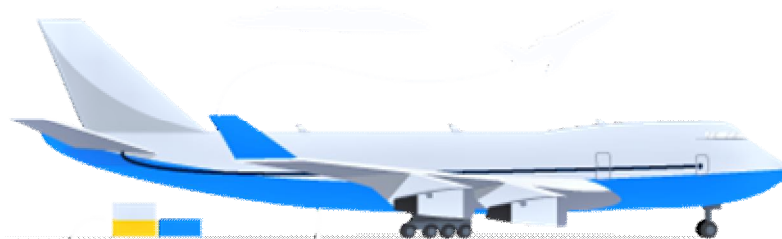

Considering the COVID19 situation globally with increases in COVID cases, we have extended our COVID-19 customer update about the global air cargo market, especially between Europe and China.

Peak Season is in full swing heavily impacting the global air cargo market. Market demand is increasing across all regions and impacting the spot market and capacity situation.

Slightly longer waiting times and the tightening of capacity at all the airport terminals in China. Due to increased demand, especially high-tech and e-commerce firms are now increasingly utilising airfreight on the transpacific trade lane and PPE demand returning to the market, the situation is aggravated by the new Air Traffic Control Procedures during the exhibitions (CIIE etc.) and holiday season, the air cargo market therefore is not only predicted to be challenged by a tough peak-season in November 2020, but likely to be impacted also in 2021.

Please staying engaged with us in your latest plans, prices and projections. We would like as always to make every effort to support your business.

Your Fischer Global Services Ltd.

**November 2020**
